

KIP 2300 HIGH PRODUCTION CCD SCAN SYSTEM

KIP 2300 CCD SCANNING SYSTEM

High Production Scan System

The new KIP 2300 high productivity scanner sets a uniquely high standard for speed, quality and flexibility in a digital image capture system.

Best in class productivity is achieved by a combination of advanced camera based image capture and new KIP Tru•Speed Technology for high speed data throughput with no system pauses or slow downs.

Outstanding image quality is delivered through the innovative use of bright white LED light sources for illumination and 600×600 dpi image capture resolution.

The KIP 2300 is a high speed scan solution that provides world-class workflow flexibility through its ability to scan face up or face down and scan thick mounted originals and loose sheets of paper from a single unit.

Versatile Camera Imaging

The KIP 2300 Color Scanner Solution can support both monochrome and color scan-to-file and copy to satisfy most application needs. When scanning to file, users have advanced software controls over image quality; when copying, a closed loop calibration system adjusts output to the exact inkjet device being used for output, ensuring maximum copy quality.

The KIP 2300 scanner is powerful, with image capture speeds from 5 ips to 15 ips in monochrome (dependent on dpi) and 2 to 6 ips in color. The image capture area is up to 36 in. wide, yet originals up to 42 in. wide may be fed through the scanner.

Three independent imaging cameras with an advanced laser alignment system and self calibrating diagnostics provide an extraordinary level of quality.

Tru Speed

- Faster than any other competing image transfer technology
- 190 times faster than USB 1.0!
- 4.8 times faster than USB 2.0!
- 2.9 times faster than Firewire!
- Scan documents at full speed and full resolution
- No scanning pauses or slow downs

Flexible Scan System

600 dpi optical resolutions is the key to the KIP 2300 Color Scanner's outstanding imaging capabilities. In addition, the KIP 2300 Color Scanner takes full advantage of patented (Real Time Thresholding) and self calibrating imaging cameras to ensure high quality results.

To optimize image size for intended use, users can select custom resolutions, for example 72 dpi for website and PC monitor displays and 300 for offset press work.

KIP Tru•Speed Technology

The technology used in KIP Tru•Speed scanning provides an image data transfer rate of 2.3 GB per second, ensuring high productivity for the most complex full color documents. Originals are imaged at maximum speed with no scanning slowdowns or pauses, as found in all competitive scanning systems. KIP Tru•Speed scanning delivers full color, high speed imaging for the most demanding production environments.

KIP COLOR PRO

KIP Color Pro

KIP Color Pro software provides all the features of KIP Color Advanced, plus file to print, professional ICC color management, image editing capabilities, paneling of images for outdoor graphics, nesting of images for optimum media usage and much more.

- Supports a full range of color file formats
- Create, edit & save image quality filters
- Integrates with single or multiple printers
- Accurate color from closed-loop calibration
- Scan to email, USB drives, mailboxes or network
- Professional grade image enhancement options
- Expert mode printing features
- Black point and white point adjustments
- Sharpness and scan speed control
- Image editor with deskew and cropping

KIP 2300 SPACE REQUIREMENTS

KIP 2300 Scanning System Space Requirements

KIP 2300 Top View

KIP 2300 SPECIFICATIONS

General		
Scanner Type	C.C.D. with KIP Tru • Speed Technology and KIP RTT Technology	
Scan Resolution	600 x 600 dpi optical resolution	
Scan Speed	Up to 60 ft /18 m per minute (Mono), Up to 30 ft / 9 m per minute (Color)	
Scan Formats	TIFF, Multipage TIFF, PDF, PDF-A, Multipage PDF, DWF, Multipage DWF, JPEG, CALS	
Scan Destination	Local USB (Removable Media), Unlimited IPS Mailboxes (Local), Unlimited FTP, Unlimited SMB	
Original Size Width/Length	Originals Up to 42" - 36" / 1,066 mm - 914 mm Scan width	
Original Thickness	Up to .6" / 16 mm Automatic thickness detection	
Original Face Up/Face Down	Both - Dual Original Feed Tables	
Interface	USB 2.0, KIP Tru•Speed Technology (2.3GB per sec data transfer)	
Dimensions	55" W x 21" D x 11" H / 1,399 mm W, 480 mm D, 310 mm H	
Weight	160 lbs / 73 kg	
Electrical	100-240V AC 50/60 Hz	
Power Consumption	<120 W	
Minimum PC Requirements (NOT INCLUDED WITH SCANNER)	Quad Core Processor (such as an Intel i5 or higher) Windows XP / 7 / 8 (32 or 64 bit version) 8GB RAM with 64 bit or 3GB RAM 32 bit 1 TB Hard Drive 1 Gig RJ45 LAN Port DVD/CD Optical Drive One USB 2.0 Port for KIP Color Advanced / Pro (scanner connection) One PCI-E Port (for use with the KIP Tru • Speed Card (HIL) for KIP 2300 One USB 2.0 Port for KIP RIP (product code connection) 20" Flat panel monitor (with VESA - 75 or 100 mount patterns for use with a KIP scanner stand) USB keyboard and mouse
